

SHELLY 1 Gen3 4-Pack WLAN Smart Relay

Model: FG3800235261781

Manufacturer: SHELLY

EAN: 3800235261781

Product Code: 982725

R1,525

Allterco Robotics Shelly 1 Gen3 is a compact smart switch designed to add reliable remote control and automation to lighting and electrical circuits. It installs in a wall console and connects to the home network for control through the Shelly Smart Control app or popular smart home platforms, enabling convenient on/off control, scheduling, and scripting-based automation for lights, heating, cooling, irrigation, and doorbell functions.

The device supports a wide voltage range and handles common load types while offering safety features such as overheat protection and a resettable dry contact relay, making it suitable for many household and light commercial applications. Built-in temperature sensing and support for standards like Matter, KNX IP, MQTT, and HTTPS enable predictable integrations with voice assistants and smart home systems for a seamless user experience.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
