

SHELLY 2PM Gen3 4-Pack WLAN PM Switch

Model: FG3800235261927

Manufacturer: SHELLY

EAN: 3800235261927

Product Code: 982727

R1,919

The Shelly 2PM Gen3 from Allterco Robotics is a versatile relay controller designed for integrated systems and automation. With a power measuring function, this device allows for efficient monitoring of energy consumption, making it ideal for smart homes and energy-conscious environments. It features support for scripting, allowing users to customize and automate their control processes, while safety features such as overheat and overvoltage protection ensure reliable operation under varying conditions. Operating efficiently within a wide temperature range from -20°C to 40°C and suitable for 30% to 70% humidity environments, the Shelly 2PM Gen3 is built with durability in mind. Its compatibility with various protocols, including MQTT, HTTPS, and WebSockets, ensures seamless integration with existing smart home systems, enhancing connectivity and control through Bluetooth and Wi-Fi technologies. The device's ability to function in gateway mode adds to its versatility, supporting a wide range of IoT applications.
