Up to 11 WAN Ports & One USB WAN for Mobile Broadband

Software Defined Networking (SDN) with Cloud Access

Remotely manage your access points, switches, and gateways across multiple sites all from a single interface.

High-Security and High-Performance VPN

SSL/ IPSec / GRE / WireGuard / PPTP / L2TP VPN & OpenVPN easily build secure VPN tunnels for secure Internet browsing, communication between different branches, or enabling remote work or study from home.

Abundant Security Features

DPI (Deep Packet Inspection)

Easily specify internet access rights and strategies via DPI (Deep Packet Inspection), IP/MAC/URL Filtering and Access Control List (ACL).

IDS/IPS

The integrated IDS/IPS engine bolsters threat detection and defense. It is constantly protected via the built-in attack prevention signature database with 7000+ signature rules that can be updated regularly.

DoS/DDoS Protection

Automatically detects and blocks Denial of Service (DoS) attacks such as TCP/UDP/ICMP Flooding, Ping of Death, and other related threats.
