Sound that speaks to your soul. Lossless audio, boundless joy. Elevate your life, one note at a time. Luxury sound, everyday comfort. Designed to Inspire.

Get ready for the JBL Tour One M3, our best-sounding and most feature-rich over-ear headphones ever. Lose yourself in lossless audio from the built-in 192kHz 24bit DAC. Make the miles disappear with music and movies from the in-flight entertainment system using the included 3.5mm cable (a USB-C cable is also included). Or go wireless with stunning Hi-Res Audio via Bluetooth®. JBL Spatial 360 sound with integrated head tracking makes music and movies even more immersive. True

Adaptive Noise Cancelling 2.0 tunes out distracting ambient noise in real time, so you can concentrate on your work—or your favorite playlist. Use the JBL Headphones app to customize your sound and have full control over all functions of your source app.

Hi-Res Audio with legendary JBL Pro Sound

Robust 40mm mica dome drivers are precisely tuned to deliver deep bass, balanced mids, and crystal-clear highs. Thanks to the built-in Digitial-to-Analog Converter (DAC) you can enjoy high-quality lossless sound with low distortion and accurate conversion from any device using the included USB-C cable. Or use the 3.5mm cable in any headphone jack. Wireless fans can hear detailed Hi-Res Audio, closer than ever to how your music sounded in the studio, with LDAC. Transmitting approximately three times more data than conventional Bluetooth® audio, it delivers outstanding 24-bit sound. And because that sound quality means you'll want to listen for a good long time, the super-soft ear cushions guarantee a comfortable fit. Plus, their perfect seal promises perfect silence for the most immersive audio experience.

8-Mic True Adaptive Noise Cancelling 2.0 with real-time adjustments

Make wind, street noise, and workplace chatter all go away. 8 mics (4 on and in each ear cup) listen for ambient noises around you in real time and automatically return the inverse phase to you, so you barely hear a thing other than your music. Or, when you want to stay more aware of your surroundings, use Ambient Aware and TalkThru in the JBL Headphones app to customize what and how much you hear.

Immersive JBL Spatial 360 sound with Head Tracking

Introducing JBL Spatial 360. Whether you're listening to music, movies, or games, next-generation JBL Spatial Sound is a more natural, realistic, and accurate immersive experience than ever before. It processes more details from any stereo content to generate reflections and reverberation signals. Applying diverse parameters at different frequency ranges, it creates a more realistic listening experience. And integrated head tracking means that sounds stay fixed in space, even when you turn your head, adding a new layer of realism to your immersive listening.
